RESEARCH EXPERIENCE

WISE Lab, University of Waterloo

Research Assistant; Advisor: Krzysztof Czarnecki

Waterloo, Canada

September 2025 – Present

- Research focused on vision-language-action models for autonomous driving, with an emphasis on multimodal reasoning and decision-making in complex driving environments.
- Developing LiDAR-grounded driving agents that combine 3D perception, multimodal understanding, and language-conditioned decision making for robust autonomous driving.

TIGER Lab, University of Waterloo

Research Intern; Advisor: Wenhui Chen

Waterloo, Canada

July 2025 – Present

- Research focused on LLM agents, agentic post-training, and self-evolving learning algorithms that leverage rich automatic feedback for scalable supervision.
- Contributed to research on software engineering agents, visualization coding agents, and reward-driven agent optimization, resulting in publications including SWE-QA-Pro and VisCoder2.

Speech and Language Lab at TTIC

Research Intern; Advisor: Honyuan Mei and Karen Livescu

Chicago, IL

July 2023 – December 2023

- Conducted comprehensive research to identify and demonstrate inherent biases in LLMs, including LLaMA 2, highlighting the capability of these models to self-correct biases through targeted prompting.
- Successfully utilized a Chain-of-Thought few-shot prompting technique, demonstrating its effectiveness in mitigating gender biases within LLMs.
